

Background

Dr. Jones is among a select group of pain specialists in the Kansas City area with fellowship certification through The American Board of Anesthesiology, The American Board of Pain Medicine, The American Board of Interventional Pain Physicians and The World Institute of Pain.

A native of Kansas City, Kansas, Dr. Jones received his undergraduate degree from Harvard University. He completed medical school at Meharry Medical College, following the footsteps of his grandfather, father and brother.

Dr. Jones completed a rotating surgery internship at The George Washington University Hospital, followed by an anesthesiology residency at UCLA-affiliated King/Drew Medical Center. He completed fellowship training in interventional pain management at The Oregon Health Sciences University.

In his free time, Dr. Jones enjoys tennis, running, college basketball, and spending time with his wife and four children.

Referrals Patient Testimonials

Referral Process:

Dr. Jones suggests that you be referred to him by a medical provider (family physician, surgeon, nurse practitioner, chiropractor, etc.). This facilitates obtaining previous medical information relative to your condition prior to your appointment.

Evaluating your pain condition is our primary concern. The initial evaluation will determine the true cause of your pain. Dr. Jones will review the results of previous diagnostic tests and may recommend additional medical tests to further identify the cause of your pain.

Dr. Jones will work with you to create an individualized plan of treatment for your pain so that you may resume everyday activities.

Patient Testimonial:

David: Dr. Jones has been by far one of the most polite, knowledgeable, down to earth, and to the point doctors. I respect him for his ability to talk to the patient as a person and genuinely care. He took the time to explain everything in terms that were easily understandable and provided much needed pain relief. I would highly recommend him!
